

## GS Andiamo/ Team California Juniors Risk Management Program

Dear Parents, Athletes, Coaches and Supporters of GS Andiamo Cycling Program,

GS Andiamo has a risk management program for supporters of youth cycling. This program is designed to meet current California and national requirements and is based on other widely used risk management strategies employed by other youth athletic organizations. If you are in contact with youth athletes at any GS Andiamo function then this program is for you. This includes coaches, team directors, mentors, volunteers, and any other support or directing staff. If you have any questions regarding this policy contact Sean Wilson who is coordinating this effort [sean@gsandiamo.com](mailto:sean@gsandiamo.com).

The Program has the following Components:

1. Background Check (\$20)

[- Waiting for current codes -](#)

2. SafeSport Training (Free)

<https://www.usacycling.org/resources/safesport/safesport-training>

3. CDC HEADS UP to Youth Sports: Online Training (Free).

<https://www.cdc.gov/headsup/youthsports/training/index.html>

4. NFHS Sudden Cardiac Arrest training (Free)

<https://nfhslearn.com/courses/61032/sudden-cardiac-arrest>

As part of the NFHS course registration it asks for your organization. Type in GS Andiamo. You can leave the sport drop-down menu blank as there is no option for cycling.

Current USACycling Coaches and Officials and National Interscholastic Cycling Association (NICA) coaches should already have performed many of these tasks, though possibly through other providers. Provide your name, license number, and certificates, and we will verify your status.

When you complete your training forward copies of your certification to:

Sean Wilson
